
The pet of the month is...

Spark Plug

Spark Plug is a nine year old mixed Black Lab, Doberman, Rottweiler and German Shepard that Tegan Gonzalez has had since she was a puppy. Tegan says that Spark Plug doesn't act her age and still has lots of energy. She has a fondness for playing ball and even has a favorite ball that she borrowed from Tegan's children. She also adores playing fetch with sticks but after about 20 minutes she starts chewing on them. Spark Plug is very good with Tegan's children and will even let Tegan know when the baby needs a diaper change. Spark Plug loves to get attention from the children even if it is not always positive attention. She walks the oldest child to the bus in the morning and waits for the bus to drop her off again in the afternoon.

Spark Plug adores sleeping on the bed with Tegan even though she is not allowed on there. She will wait until Tegan is asleep and then climb up onto the bed. If she is not sleeping on the bed she is on the floor next to Tegan. Spark Plug doesn't get very many treats after she decided to help herself to four dozen chocolate chip cookies that had extra chocolate chips in them and got very sick. However, there is one treat that she gets every month and loves, her heartworm preventative.

Spark Plug had one litter of puppies before she was spayed and she cared for all eleven of them. She also tried to help Tegan take care of a kitten that Tegan brought home from the farm where she works. Spark Plug also taught Tegan's other dog, a rescued Great Dane that had forgotten how to be a dog, how to do things that a dog would do such as bark and wag their tail. Spark Plug was a good teacher because the Great Dane remembered how to be a dog again.

We have enjoyed working with Tegan and Spark Plug over the years and are looking forward to many more wonderful years.
